Subject: Caribou Public Safety - Updated plans

Good afternoon –

I thought it was a good time to send around the four different options with a few changes that were requested and ask for questions / responses / corrections . . . what I would like to do is have you guys review the options and then set up a conference call with a small group (the three of you and maybe one or two more) and then look at taking the next step . . . let me know if you have time at the end of the week or the beginning on next week (I am out August 9 to 14) . . .

Just to make sure we are all on the same page:

- Option A – Police & Fire at the Birdseye site
- Option B – Police only at the Birdseye site
 - The Police Department is situated in such a way that the Fire Department could be added at a later date
- Option C – New Fire & Police on the existing Fire Department site
- Option D – New Police & Renovated on existing Fire Department Site
 - With this option, the Police & Fire Departments are separate so that the departments could be phased and done at two separate times
- *(we can change what is Option A, B, C or D after we talk) . . .*

Once we have discussed the different options & discussed any changes, I will work up a cost estimate based on square footage for all the options . . . please let me know if you have any questions, las
