Not sure if it is a substitution or you are stating that it meets the criteria for “equal to” – This is an open, federally-funded project so no particular product is “required” to be used. Products are all either “basis of the design” or a “recommended” manufacturer.

In the meantime, I have sent to the engineer for review.

Good Morning,

My name is Sean O'Brien with BASiX Automation Integrators. I was hoping to follow up on a substitution request we emailed over to your company yesterday for the above mentioned project. If you could provide any status updates that you might have on this request and where it is at in the approval process, I would greatly appreciate it. Thank you and have a great day!

Good Afternoon,

We came across the above listed project and are very interested in participating in the bid process for the DDC control system portion of the project. Attached you will find our substitution request form, along with an information packet about our company. We would greatly appreciate your taking the time to consider our company for inclusion in your project. Thank you and have a lovely day!
