RE: City of Caribou, Proposed Public Safety Facility
BRSA Project #: 2019.138

Dear Mr. Marker,

Enclosed is our statement of qualifications for the Proposed Public Safety Facility in Caribou, Maine. The information provided will demonstrate our very qualified project team that consists primarily of Aroostook County residents. We have a deep understanding of the construction climate within the Caribou area as well as the needs of the community. Our proximity to the project site will allow us to be reactive to the needs of the project and to be readily available for meetings and site visits.

We have extensive history in working with municipalities throughout Aroostook County and throughout Maine. The project profiles included in our proposal outline our history of working in Caribou along with completing projects of similar nature. In addition to the projects outlined in the attached document, we have recent history completing designs for Customs and Border Patrol, Houlton State Police Barracks, Northern Maine Regional Airport, Bridgewater Fire Department, and various other municipal buildings including community centers, sand/salt sheds, storage facilities, public pavilions, city hall renovations and storm water system designs.

It is very apparent that the Caribou Police Department is in need of a new space in order to provide the necessary services to the community they serve. This facility will directly impact members of our project team, and therefore, it is important to us that this project is a success. We appreciate the opportunity to provide you with the following information. Please do not hesitate to call if you have any questions.

Sincerely,
B. R. Smith Associates, Inc.
